

# BALDWIN FILTERS WITH TEXTURED PAINT

Textured Paint Surface

Standard Paint Surface

The B7299-TX, as well as the standard version B7299, is a high efficiency lube spin-on. The B7299-TX was specially produced with a textured paint covering the entire surface of the filter from dome to baseplate.

The textured surface allows for a better grip and greater control while handling the filter during installation and removal when:

- Hands are covered with oil
- Exterior of filters are covered with fluids
- Weather conditions are extreme and gloves are worn
- Filter locations on equipment are hard to access

The -TX filters (B7299-TX and BF7639-DTX) are currently not included in the Baldwin product line, but are available via special order. Please contact your Baldwin District Sales Manager for more information on this product.

## RECEIVE A FREE HAT

When you purchase a case of 6 Baldwin filters with textured paint, you receive an ABC / Baldwin Flex Cap\*.

\*Limited quantities available.
